## Wm. Borrows Deputy Mayor During Mayor's Absence on Holiday

Routine Business Occupies Council's Attention at Meeting on Monday night

Present at the meeting were Mayor Pattinson, Councillors W. Borrows, W. Chapman, Fred Andrews, W. H. Haysom; Councillors Serak and Harry being absent, owing to being at work.

Owing to Mayor Pattinson's absence at Victoria for a month, W. R. Borrows was appointed deputy mayor. The tax roll of 1934 was confirmed for 1935 for assessment purposes. J. Ford was appointed assessor.

E. D. Battum, of Calgary, was re-appointed auditor, his work being highly recommended by the council.

Nominations for vacancies on the council will be held on the first Monday in February, with election, if necessary, one week later. The annual ratepayers meeting will be held on Friday, January 25th, in the council chambers, the same evening as the annual meeting of ratepayers of Coleman school district.

## MISCELLANEOUS

Attention is called to the display advertisement of the 1935 Pontiac, for which Sentinel Motors are local dealers in Crow's Nest Pass town.

Mayor and Mrs. George Pattinson left on Tuesday to spend a holiday at Victoria, B.C., and will remain there for about a month.

The birth of a daughter is announced by Mrs. Philip Wagner, of Columbus, Ohio. Mrs. Kilgannon, mother of Mrs. Wagner, is at present staying with her daughter.

Mr. H. B. Lyall of Winnipeg was the guest of Rev. and Mrs. A. S. Pattinson on Sunday and Monday. Mr. Lyall was returning from a business trip to Vancouver.

A. M. Morrison, General Electric dealer for Crow's Nest Pass town, will gladly give information concerning all kinds of electrical appliances and cost of operation. Ranges, refrigerators, washing machines, vacuum cleaners, and smaller appliances may be used economically under the minimum rate for heating and there are many time and labor-saving appliances to take the drudgery from housekeeping.

notice

FROM THE JOURNAL

13 YEARS AGO

There have been several births in town lately, but as the parents don't seem to give a damn, neither do we; so they have not been chronicled in The Journal. Wake up, bring in your items, especially the new arrivals.

(Ed. Note—The present editor did not know the editor of that time, V. L. Dunning, who is dead, but his wife is at present running a bright weekly at Ladder, B.C., and was present at the annual convention of the C.W. of A. at Montreal in August).

The Badminton Club makes preliminary announcement of its annual dance to be held on Friday, Feb. 15, at the Community hall. This is a popular annual social event and is attended by many other towns in the Pass.

## IN MEMORIAM

BROWN—In Loving Memory of our beloved daughter Nancy, who died January 22, 1932.

When we reach the heavenly garden and see her in full bloom, The flower we loved so dearly and thought God plucked too soon. Oh, then we will know the reason 'Twas we know it not to-day, 'Twas in her fragrant beauty God took our flower away. Lovingly remembered by her parents, Mr. and Mrs. George Brown and sister Olive.

IN LOVING MEMORY of Nancy Brown, who passed on, Jan. 22, 1932. Lovingly remembered by Wilma Halliwell, U. of A. Hospital, Edmonton.

## Monarchs First Defeat in Crow League Series

Coleman Canadians kept pace with Lethbridge when each won their league engagements on Monday evening, the Canadians taking a 6-3 decision from the Medicine Hat Monarchs. The Monarchs certainly did not live up to the reputation which had preceded them and Coleman have been seen to better advantage. Play on the whole was ragged and the combination of plays of the Canadians did not clicking to the perfection that they should.

Close checking featured the opening of the first period with each team back checking vigorously. Jenkins put his team ahead in eight minutes when he beat Woods from close in. Jim Fraser made it 2-0 a minute later as his shot whistled past Woods. Monarchs rallied their forces and Colagrosso was called upon to save several shots which he handled easily. Quail, the bad man of the evening, received two successive penalties for tripping. Individual efforts predominated on each team till a few minutes before the end of the period when Bill Fraser took the puck into the Hat zone and passed to Brown who scored.

The Hatters were seen to better advantage in the second period and kept Colagrosso a little busier than in the first. Erratic shooting caused them to miss many golden opportunities to score. Melbourne opened the scoring in eleven minutes when he took Carver's pass to beat Colagrosso. Thirty seconds later Joyce shot from well out to beat Woods for Coleman's fourth goal. Monarchs gained the upper hand in the last few minutes of the period and Brown of the Hat scored from a scrimmage in front of Colagrosso. Quail and Simmons were sent off for tripping during the closing seconds of the period.

With the Hatters two men short Coleman played with four forwards to open the third period. A scoring spree resulted as Bill Fraser scored in one minute and Jim Fraser repeated half a minute later. Monarchs tried desperately to reduce the deficit, Crane finally scoring in six minutes assisted by Quail. Coleman played a defensive game during the remainder of the period when Vejrava, playing his first game for Coleman, showed to advantage.

Coleman—Colagrosso, J. Fraser, Brown, W. Fraser, Jenkins,

Lydia, Joyce, Johnson, Vejrava. Medicine Hat—Wood, Quail, Thompson, McArthur, Brown, Simmon, Crane, Melbourne, Carver, Middleton, Starling.

First period—Jenkins, 8.00; J. Fraser 9.30; Brown assisted by W. Fraser, 16.30. Penalties, Quail, Quail, Johnson.

Second period—Melbourne assisted by Carver, 11.00; Joyce, 11.30; Brown, 11.15. Penalties—W. Fraser, Quail, Quail, Simmons.

Third period—W. Fraser, 1.00; J. Fraser, 1.30; Crane assisted by Quail, 6.00. Penalties—J. Fraser.

Severity of weather caused postponement of to-night's game between Lethbridge and Coleman. The bus company refused to take responsibility of bringing the team to Coleman.

Support our advertisers. They deserve your business—they sell dependable merchandise.

## Period of Stormy Weather

Since a day or two prior to Christmas, temperatures have been on the average quite low, ranging from freezing to the lowest of over 40 on Christmas Day. Considerable snow has fallen during the month, and Wednesday morning brought a very cold wind from the east, though the temperature was not as low as at other times, registering zero at International mine office. An old saying is to the effect that as the days lengthen the cold strengthens, and the lengthening of days is more noticeable in the evenings than in the mornings.

## Crows Nest Bonspiel Opens at Cranbrook on Monday

Sam Moores, Veteran Curler, Will Skip Rink from Coleman—D'Appolonia, Antrobus and Brown in Rink

With ideal ice conditions prevailing, the curlers have reached the half-way mark in their league schedule. D'Appolonia is leading the field with the Cousins rink one game behind. A number of teams are still in the running as they go into the second half. The Crows' Nest Pass bonspiel opens at Cranbrook, Monday, January 21st. Coleman will be represented by one rink, composed of Sam Moores, J. S. D'Appolonia, Fred Antrobus and Allen Brown. There is a possibility that another rink may be formed, but arrangements have not yet been decided.

Coleman is next in line for the Crows' Nest bonspiel, but if Pincher Creek bids for the honor, Coleman will withdraw its invitation.

Arrangements will go forward after the C.N. bonspiel to promote the Studebaker and Pontiac competitions, which will be played in the local rink.

To sell household articles, which you may desire to dispose of, use the Classified Column of The Journal at 2c a word with a minimum charge of 15c. Big returns for little outlay.

## St Alban's Guild Hold Annual Supper in Parish Hall

Invite Members of Vestry and Choir Who Enjoy Hospitality of Ladies' Organization

A splendidly served menu of a most appetizing nature greeted the guests of St. Alban's ladies' guild at their annual supper on Saturday evening, whose efforts were highly appreciated by the invited guests.

Rev. Mr. Pattinson as chairman, expressed the thanks of the guests; also H. T. Halliwell for the vestry; Mrs. H. E. Gate replied for the ladies, and in acknowledging the work of those who had helped to build the kitchen, stated she was pleased to inform the gathering that it was entirely paid for, and in addition, she presented a cheque from their funds towards the church expenses.

Acknowledgment of the services of Mrs. George Brown as envelope secretary was made by H. T. Halliwell, Mrs. Brown briefly replying, stating she was pleased to give her services in this branch of church work. Mrs. M. Clifford expressed her thanks to the ladies for their remembrance at Christmas, they having made her a gift as a tribute of appreciation for her faithful services as organist.

Following the supper, the younger members played "Hooie-hooie," while the older people played bridge. The last hour was spent in old-fashioned dances, in which all joined, and the evening concluded with "Auld Lang Syne" and the National Anthem.

Mr. Spalding, of Vancouver, called on H. C. McBurney this week. He is on his annual tour in connection with his photographic business, which he established in Vancouver several years ago. He is a former publicity commissioner. His photographic views gained wide circulation and have been reproduced on postcards, stationery and in large pictures and various other souvenir forms. McBurney's drug store is the local representative.

Mrs. Pete Elzko won the valuable diamond ring raffish by the Italian Society, which was drawn for at the weekly dance in the society's hall on Saturday evening.

Coleman School District No. 1216

## Annual Meeting Friday, January 25, 1935

in the Council Chamber at 8 p. m.

Financial Report for 1934 and reports of committees will be submitted.

PUBLIC NOTICE is hereby given that a meeting of ratepayers of Coleman School District No. 1216, will be held in the Council Chamber, Town of Coleman, on Friday, January 25th, 1935, at 8 o'clock p. m.

Dated at Coleman, Alberta, this 10th day of January, 1935.

#### The World At The Cross-Roads

The history of this old world unfolds a continuing story of revolutions—some peaceful in character, some accomplished by physical force accompanied by great loss of life, incalculable suffering, and enormous destruction. Over and over again the history of man records revolutions—political, religious, social and economic.

In many cases it is impossible to say when a revolution actually began and when it may be said to have ended, because there was no gradual in their development and progress as to be regarded as evolutionary instead of revolutionary, yet in their ultimate effect upon mankind they were distinctly revolutionary in character.

On the other hand, there have been revolutions which may be said to have started almost over night and reached their climax in a very short period of time, but the underlying causes nevertheless had been accumulating throughout the preceding years.

The birth and teachings of Confucius, Mohammed, Jesus, Martin Luther, were all revolutionary in the religious life of peoples; the discovery of the power of steam ushered in the industrial age and revolutionized the whole economic structure through the machine replacing hand labor; the invention of printing completely altered the social, fabric, and science and invention have progressively changed political, social and economic systems.

Other revolutions of a political character have had a lasting effect upon the world, although many of them, unlike the other revolutions referred to, operated not to advance the welfare and betterment of mankind, but to set back the hands of the clock of progress and delay betterment which would have been promoted through more orderly evolutionary processes.

The world is now passing through another revolutionary stage, and while conditions and developments prior to the Great War were laying a foundation for the present upheaval, the war itself may be designated as the culminating event which marks the beginning of the revolution, which embraces our political, religious, social and economic life and activities.

In some countries of Europe and Asia this revolution has developed, and is being promoted through the application of physical force, restriction of individual rights and liberties, the overthrow of democratic political institutions, interference with religious liberties and beliefs, all ending in the assumption of full power by autocratic dictators. And on this continent of the new world there are forces at work striving in season and out of season to induce the people to forsake their individual liberties, overthrow the existing system of government, whatever its defects, they have attained their present state of civilization, and revert to a state and method of living from which the race has progressed upward throughout the centuries of the past.

And because of the difficulties of the present—inevitable from all great change—and without giving due heed to the lessons of all past history, many people are giving an attentive ear to the impassioned urgings of the prophets of despair, who, of course and as always before, paint the rosiest pictures of what the future will be if their particular panacea is accepted.

On this continent of the new world people have been trained in the idea of democratic government—government of the people, by the people, for the people—that it was the duty of a government to govern; that governments were created solely for that purpose. Now the idea is urged that governments should not govern people as the people themselves dictate, but that governments should order and control the people; that instead of the people being supreme, controlling the government, the government should be supreme and all-powerful controlling and ordering the people. That is the proposal is a reversion to what is known as the Dark Ages when kings and tyrants ruled and the people worked and obeyed.

And in order to secure support for taking this backward step people are offered "security." People want security, they are entitled to it, they must have it. And the people can and will get it because they have the power to establish it. But the security which they desire is not the security to be secured by dispossessing themselves of power and handing it over to any dictatorial form of government. Loss of liberty and freedom can have but one ultimate end—the loss of security. Even if security could be established, the price to be paid is too great because the losses sustained would far outweigh the one proposed gain. An animal in a cage enjoys security which the one roaming its native wilds does not enjoy, but what animal prefers the cage to freedom? And man least of all.

It is also urged that only through the overthrow of the existing system can equality be established. But equality does not and cannot exist under any system. It does not exist under any system today, and never existed under any system of the past. Neither things nor people can be made equal. But things can be made equitable—and must be made so if we would preserve ourselves.

In this age, as in past ages, not merely inequality but things inequitable exist. The latter must be righted and can be. The wide existing margin between the rich and the poor must be closed. As one writer has stated it, "there should be neither treacherous peaks at the top nor unplumbable depths at the bottom; rather, by bringing these two extremes closer together, making it calculable that, with any normal cycle, whatever suffering shall be within reason, and in better days, excess wealth devoid of madness." Things must be made equitable.

New methods are necessary, but individual initiative and individual liberty which is the charter which makes our civilization must remain the cornerstone of any structure we may erect. It must remain because it is part and parcel of our nature. Seek to suppress and destroy it, and immediately the world will be a chaos. The world will be a chaos, probably one of great destructive physical force, because man will not remain content unless he enjoys liberty. And all history establishes the fact that once liberty is taken away and the individual is curtailed, man will fight and if need be die in the effort to regain what he has lost.

#### Queer Cure Effective

Stutter To Cure Stuttering Advocated

By E. S. DODD

No longer does the modern Demosthenes roll pebbles under his tongue to cure himself of stuttering. Instead, he forces himself to stutter voluntarily. This paradoxical device of stuttering to stop stuttering was advocated before the American Society for the Study of Speech Disorders by Dr. Byong Brygelson, of the University of Minnesota, where he is now using it as treatment for more than 1,000 stutters. He claims success in 60 per cent. of his cases.

In excavating Dura on the Euphrates, archaeologists found human skeletons in some shops, suggesting that shopkeepers died defending their property or were burned in the Persian raid of 256 A.D.

#### SKIN RASHES

Give Place to Velvet Smooth Skins

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D.D.D. Dennia. This liquid prescription, now made and endorsed by Canada's Italian Balm chemist, allergy irritation almost at once, and quickly clears up skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 35c. Guaranteed to give instant relief or money refunded.

W. N. U. 2081

#### Running Crime To Earth

Royal Canadian Mounted Police To Obtain Instruction From Scotland Yard

It seems a good idea to send officers of the Royal Canadian Mounted Police to famed Scotland Yard, in London, Eng., for instruction in criminal investigation work and in other branches of police activity. Two high officers of the force are about to leave for three months' instruction—Assistant Commissioner Wood, of Regina, and Assistant Commissioner Dann, of the Manitoba and northwestern Ontario division.

More and more are the Mounted Police engaging in work that calls for scientific application. More and more are they engaging in work that takes in the whole of Canada and that involves every type of criminal. It is important, therefore, that its members be thoroughly "up" on the job of combating crime. More and more does crime prevention work call for intelligence and expert methods.

The R.C.M.P., by contacting itself with Scotland Yard in this way, will have the benefit of experience with perhaps the world's greatest crime detection agency. Scotland Yard has a great reputation for hunting down and bringing to book offenders against society. Like the Mounted Police of Western Canada itself, it has a name for "getting its man."—Regina Leader-Post.

#### Economic Development

British Government Said To Have Scheme To Assist The Empire

Great Britain is about to announce a vast program of economic development throughout the empire, the Daily Herald, Laborite medium, said. The British government, the Herald added, would make the announcement after the commemoration on May 6 of King George V's silver jubilee.

It will take advantage of the presence in London of many Dominion and colonial statesmen to set forth a new plan for advancing loans at low rates, so as to permit all parts of the Empire to undertake public relief works, it was explained.

The Herald said funds would be lent on condition that they would be expended for the good of British industry. It drew the conclusion that the national government's move was an attempt to hasten the general elections.

#### Russians Do Glider Stunts

Carry Out Two At Moscow Unique In Aviation History

Glider stunts have been made at Moscow unique in aviation history. The Soviet glider pilots, Koshits and Garvish, demonstrated for the first time in the history of gliders, an "Immelmann barrel figure." The glider first climbed for a loop and after reaching the highest point in the loop continued flying horizontally upward down then returned to its original position. The Immelmann barrel figure, which consists of a double turning over the wing while flying horizontally was then carried out.

#### Death Duties Enrich Britain

More than £400,000 or \$2,000,000 were added to the British Treasury in death duties in a single day on wills proved at Somerset House, London, on Dec. 7. The total amount in death duties for the first four months of the fiscal year ended Dec. 1 was \$225,521,411, only 3 per cent. of which is unavailable on account of litigation.

#### Card Was Delivered

Postal authorities at Calgary were presented with a problem when a postcard arrived with no address but the picture of the addressee. It was mailed from De Soto, Missouri, by a tourist who met the addressee on a trip through the Rocky Mountains and had forgotten his friend's name. He mailed the photograph and it didn't miss a delivery.

#### Rheumatism

Is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—50c a box at all druggists.

#### First Photograph On Paper

The year 1834 is famous for the production of the earliest recorded photograph on paper. This was the work of Henry Fox Talbot, who used paper sensitized by means of silver chloride. His book, "The Pencil of Nature," written in 1843, was the first book to be illustrated with photographs.

The forest area of Manitoba has been officially estimated at 137,000 square miles.

Not even strong acids compare with water as a dissolver of chemical substances.

#### Does Not Say How

Moscow Professor Thinks Man Can Live To Great Age

The normal span of human life will eventually be extended to ages ranging from 150 to 180 years, according to Professor Lazarev, of the Moscow Institute of Medicine in the course of an interview published by the Moscow Journal Pravda. Experiments, he said, had convinced him that human beings could be made to live at least twice as long as the "three score years and ten" expectation of life to-day. "I have carried out experiments on certain animals," Professor Lazarev declared, "by which their recognized span of life has been increased as much as five times." But how life can be thus prolonged must remain the professor's own secret for the present, it seems. He is preparing to leave "on a biophysical expedition" to the Caucasus "to study the organic senses of good persons." "Geographical conditions," he says, "play a most important part in the functioning of the senses."

#### Takes Mail To Lighthouse

Postman In England Climbs 403 Steps Every Day

Postmen in the towns and cities expect to climb steps on their daily delivery rounds—lots of steps—while a climber up a precipitous slope or down a deep dale is regarded in the rural areas as so much a commonplace in the day's work of getting the mail to the addresses as to be quite unworthy of comment. But to climb down up and mill and a half steps in six years with postcards, letters and parcels is a duty that surely merits special recognition, say the Post Office Magazine. Down 403 steps, up 403 steps, six days a week, month after month, year on year, this is the normal work of Mr. R. G. Rees, postman of Holyhead, who delivers the mail to the South Stack Lighthouse, Anglesey.

#### Recipes For This Week

(By Betty Barclay)

##### FRUITED OATMEAL DROPS

1½ cups (1 can) sweetened condensed milk  
¼ cup molasses  
2 cups rolled oats  
¼ cup nut meats, chopped  
¼ cup seedless raisins.

Thoroughly blend sweetened condensed milk, molasses and rolled oats in top of double boiler. Cook over boiling water 10 minutes or until mixture thickens, stirring constantly. Cool. Add nut meats and raisins. Mix well. Drop by spoonfuls on a buttered pan. Bake 15 minutes in a moderate oven (350 degrees F.). Remove from pan immediately. Makes three dozen.

##### COCONUT APPLE BETTY

4 tart apples, pared and thinly sliced  
1 cup soft bread crumbs  
1 cup shredded coconut  
½ cup brown sugar, firmly packed  
¼ teaspoon cinnamon  
4 tablespoons butter.

Arrange layer of apples in greased baking dish. Cover with bread crumbs and coconut; then sprinkle with mixture of sugar and cinnamon, and dot with butter. Repeat until all ingredients are used, topping with coconut. Cover and bake in moderate oven (350 degrees F.) 35 minutes. Uncover and bake 10 to 15 minutes longer, or until apples are soft. Serves six.

##### Large Grain Cargo

The largest grain cargo to be taken from a Canadian Atlantic port in more than two years went from St. John to the United Kingdom by the steamship Trilway. The first ship to go to St. John in that period for a full grain cargo, the Trilway carried away upwards of 300,000 bushels.

##### A River Of Ink

Algeria, in Northern Africa, has a river of ink. Chemicals carried by waters of two joining streams form an iron ink, black iron tannate. One stream flows out of a peat swamp impregnated with tannin, while the other comes through soil filled with iron deposits.

Woman (meaningly)—"It says here in the paper primitive men never swore."

Husband (growing)—"Huh! With no flat tires, wrong numbers, radio crooners, stock markets, in their day, what did they have to be profane about?"

He—"My treasure!"  
She—"My treasury."

## Here's the ABC of COLDS-CONTROL

#### To Help PREVENT Colds

At the first sneeze or nasal irritation, quickly—a few drops of Vicks VapoRub. Its timely use helps to prevent many colds—and to throw off colds in their early stage.

To Build RESISTANCE To Colds: Follow the simple rules of health that are part of Vicks Plan for Better Control of Colds. The Plan has been clinically tested by practicing physicians—and proved in home use by millions. (You'll find full details of this unique Plan in each Vicks package.)

#### VICKS PLAN FOR BETTER CONTROL OF COLDS

#### Not All Thoughtless

Woman Driver In Toronto Has One Thing To Credit

When men and women drivers get together, it's always a hot point as to which sex is superior with the steering-wheel. Well, here are two incidents we witnessed in one week that the men will no doubt love to read about. It was five o'clock on the corner of Queen and Yonge, and you know the parking rules in operation at that hour. A woman drove across the intersection, stopped in front of a corner store, and leisurely opened the door to pick up two friends. Meantime a T.T.S. car crossed the street, followed by a motorist anxious to get in front of the big red car, but there was the parked car. A policeman hurried forward to motion the lady on her way, but she blithely waited for her passengers to get comfortable. The other motorist honked to no purpose and finally the policeman just threw out his hands in despair, while the many onlookers chuckled sympathetically and murmured: "Those women drivers!"

The same day at King and Bay another feminine driver was halfway over the curb and kept bumping the car behind her. Finally a watching policeman stepped over to her and in a patient tone said: "Lady, you have it in reverse." But here's one for the ladies. . . . a business woman getting her car from between two other parked cars in Dundas square found it necessary to shove the foremost car in front of a hydrant, but after she was safely out, she descended from her car and with thoughtful—and powerful—"woman-power" pushed the car from the forbidden spot. A couple of male observers gave her a clap—Toronto Telegram.

England now has one automobile for every 35 persons, compared with one for every five in the United States.

A courthouse clock in Indiana, U.S.A., was stopped by spiders which spun their webs inside the works.

The philosophy that identifies mind and matter is known as Pantheism.

St. Stephen, N.B., and Calais, Maine, situated on the St. Croix River, are towns in two different countries under two different flags, whose people are like one big family.

#### Keep "Leftovers" Fresh and Tasty

You know how deliciously fresh waxed paper keeps sandwiches, "Para-San" Heavy Waxed Paper will do the same for cut meats, cake and other foods that remain at the end of the meal. "Para-San" enables you to serve these left-overs again, knowing that they still possess their appetizing flavour and freshness.

"Para-San" comes in a handy roll. Just tear off what you need against the sharp edge of the box. For less exacting uses "Centre-Pull" Waxed Paper is sheets is very popular.

Your druggist or stationer has them both.

Appleford Paper Products Ltd.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

## Amelia Earhart Putnam Completes Flight From Hawaii To California

Oakland, Calif.—After the first solo flight over America between Hawaii and California, Amelia Earhart Putnam ingloriously struck the Pacific mid Sunday as she attempted to takeoff for Washington. The incident, however, did not dim the glory of her record-breaking trip which ended Saturday to the cheers of 5,000.

Hastily combing her tousled locks, "I'm tired," said the famous holder of many aviation records as she popped her head out of the cockpit and saw the crowd.

The wheels of her swift monoplane touched dry land at 1:31 p.m. (4:31 p.m. E.S.T.), just 18 hours and 16 minutes after her exciting takeoff from Wheeler field, 25 miles out of Honolulu. Two hours after landing, she went to bed—without benefit of negligence—in an Oakland hotel.

Not satisfied with two aerial trips across the Atlantic and a host of other aviation honors, the 36-year-old flyer challenged the Pacific as has no other man or woman. She came through only after fighting a variety of weather and giving California watchers an uneasy three hours, during which her position was not known.

"It was worse than the Atlantic flight," she said. "There was no purpose or reason for it."

"I had hoped to be in Washington by now," she said later, ruefully at her bespattered plane. "But I'll have to change my plans."

Shortly after 1 p.m. she was enabled to takeoff for Los Angeles, where her mother awaited her.

Miss Earhart came to the airport shortly after 10 a.m., after a refreshing night's sleep at her hotel and breakfast at 7:30 a.m. She appeared to have recovered fully from the 18-hour, 16-minute strain of the flight she completed Saturday.

Praise for the cool, clear-eyed flyer, who braved the uncertainty of winter weather to complete the first solo flight by man or woman over the Pacific, was unstinted.

"A magnificent achievement," Lieutenant Commander Clarence S. Williams, who plotted the flight, declared at Los Angeles.

Another person who declared she was never in doubt as to the successful outcome of the flight was Miss Earhart's mother, Mrs. Amy Earhart. She said at her North Hollywood home: "If you knew Amelia, you would understand why I didn't worry."

The aviatrix' husband, George Palmer Putnam, following her by steamer from Hawaii, sent her a message stating: "Swell job. Hope it doesn't become a habit."

A decree has been issued forbidding the export of mercury from Italy in all forms. Mercury is used on a large scale in the manufacture of high explosives.

## Britain's New Insurance Plan To Assist Jobless Of The United Kingdom

London.—Britain's new unemployment insurance board was taking over from local authorities the administration of relief under the dole system, which on March 1 will mean control of 4,000,000 unemployed persons.

Full centralization of relief work will not be accomplished until March, but 240 local offices which came into existence began their work.

Sir Henry Betterton, newly created baron, is head of the board. He will be personal guardian of Britain's jobless and in effect administrator of government expenditures totalling \$275,000,000 annually.

The move to centralize relief work, Sir Henry declared, would make for equality of treatment and uniform administration throughout the country.

"The board is fully alive to the fact the needs of 1,000,000 families affected cannot be forced into one mold," Sir Henry said. He cited the fact rents vary in different localities and that therefore allowances for rent must vary also. He said allowances for children will be liberalized and more generous provisions made for the personal requirements of wage earners.

Applicants will have rights of appeal for this purpose, to 150 appeal

### Cold Weather In Europe

Transportation Paralyzed And Much Suffering Reported

London.—Bitter winter weather gripped many parts of Europe, bringing distress to shipping, paralyzing communications and visiting acute hardship on the poor.

The possibility continuation of severe temperatures would produce an improvement in the European demand for wheat was seen here by Andrew Cairns, Canadian secretary of the international wheat conference.

Such a condition, Cairns said, would tend to cancel the effects of favorable weather during December, which brought good pasture for most European areas and small demand for foreign grain.

Five men were believed to have perished when a small boat sank amid grinding ice in the Danube river at Ada Huja island near Belgrade.

Railroad and telegraph traffic throughout Yugoslavia was tied up by a 30-hour blizzard and communication with the Dalmatian coast virtually ceased.

Similar conditions prevailed in Hungary and Austria, where 10 inches of snow fell in 24 hours. More than 22,000 workers, including many women, found employment digging Vienna out from beneath its icy blanket.

### Modern Voting In Sweden

Electrical Apparatus To Be Used By Parliament Members

Stockholm.—Voting in the Swedish riksdag will soon be modernized. Members of the two houses of parliament will not even have to raise their hands in order to register their "aye" or "nay." Instead, as the result of a bill recently passed, all a member need do to cast his vote is to press a button.

The riksdag is to have electrical apparatus installed which will work so swiftly that an entire vote may be conducted and tabulated within 90 seconds.

### Would Learn Peace Views

Plan To Get Stand On Question Of Federal Candidates

Ottawa.—A plan of action to be participated in by voters across Canada, whereby the views of candidates for parliament in the forthcoming federal election, on peace organization, may be ascertained and recorded, was set in operation by the League of Nations Society at a meeting of its executive committee here. Under the scheme voters who believe in a policy of peace will ask their members of parliament or candidates to state their views on the matter.

### Policy Of Reform

Premier Bennett Tells Of Great Issue Before The People

Ottawa.—Declaring that there was "no place for Fascism in Canada," and branding the Liberal party as lacking any policy except one of opposition, Prime Minister R. B. Bennett launched out on the political phase of his series of radio broadcasts. Throughout the depression he said, the Liberal party had "sat silently by and counted on hard times to defeat a government which has given its heart's blood in your service."

The prime minister told his listeners his policy of reform "will force, inevitably, a political realignment, because this policy of reform comprises the great issue before the people. And never since confederation has that issue been so clearly in this way. Do you want reform or do you not want reform? If you do not want it, back the Liberal party. If you do want it, back my party."

In opposition a party had little opportunity to implement its policies but it was its duty to "offer support to the government in its constructive measures or propose constructive measures of its own." The Liberal policy had been "to oppose the government in its forward, constructive measures."

Mr. Bennett defined Liberalism as "Toryism in the reactionary sense of the term, just as the present day Conservatism is progressivism in the best and most constructive sense of the term."

Assuring his hearers he would welcome their suggestions, the prime minister said the first stage of his reform program had been well begun. "The second stage we will immediately initiate."

### Fined For Dangerous Driving

Lord Montagu Also Loses Driving License For Two Years

London.—Convicted of "dangerous driving," Lord Edward Montagu, second son of the Duke of Manchester, was fined the equivalent of \$150, ordered to pay another \$40 costs, and disqualified from driving a motor car for the next two years.

Lord Montagu appeared in the West London police court to answer a summons issued last September. Police testified he was driving a sport car at Hammersmith on September 30, when he knocked down and fatally injured a woman who was crossing the road.

A police witness, asked how fast the car was going, replied: "About the speed of an express train."

### Malaria Takes Heavy Toll

Thousands Have Died In Epidemic On Island Of Ceylon

Colombo, Ceylon.—The epidemic of acute malaria that has been ravaging Ceylon for a month seemed to be turning the affected parts of this crown province into a vast burial ground.

More than 1,000 persons died in the island within a week, and in Kegalle district, 3,000 deaths have been caused by the disease in three weeks. It is impossible to estimate the number of dead since the epidemic first began its sweep across the island.

### WOULD CHANGE ECONOMIC SYSTEM

Premier R. B. Bennett, who has been delivering a series of radio addresses, advocating a number of reform measures which he will introduce if given a mandate to do so.

### To Complete Honeymoon

Duke And Duchess Of Kent Will Sail For Brift To West Indies

London.—The newly-married royal couple, the Duke and Duchess of Kent, will sail for the British West Indies on Jan. 25 for a visit of several weeks, completing their honeymoon.

Announcement was made that the king's youngest son and his lovely bride, the former Princess Marina of Greece, will sail on board the Duchess of Richmond, which is going on a 44-day cruise to the West Indies. They will not remain aboard during the cruise, however, and will return by another steamer. They are not expected back until early in April.

It will be the first visit to the West Indies for Prince George as well as for Princess Marina.

They have been in England since their wedding at Westminster abbey on Nov. 29, a festival occasion for London, but are expected to visit the continent before sailing for the West Indies.

### Just An Experiment

Manitoba To Ship Chilled Beef To United Kingdom

Brandon.—Hon. D. C. McKennie, Manitoba minister of agriculture, announced here the Manitoba government will sponsor a test shipment of chilled beef to the United Kingdom market this year.

Arrangements have been made with Winnipeg packing houses to make the shipments, said Mr. McKennie in address to a meeting of Manitoba livestock associations here. The shipment would be made as an experiment.

The government would sponsor a shipment of 500 head of cattle to the United Kingdom market as well, said Mr. McKennie. He expected the cattle to be ready for export next August. Where possible the cattle would be put on the feeding lots of the boys' and girls' club.

### A NEW WONDER CAR—THE GNAT

The smallest racing car in the world, capable of 120 miles an hour, has just been introduced in England by Jean Reville, the midge car speedway champion of Great Britain. This is the forerunner of a small fleet which will provide greater speed and thrills for speedway fans in the British Isles during the coming season. Here we see Mr. Reville at the wheel of his car, the Gnat, after a trial run.

## War Tension In Europe Is Lessened As Talk Of Disarmament Continues

### Awarded Damages

Long Drawn Out Case Over Sinking Of Run Runner Is Settled

Washington.—The United States-Canadian commission to arbitrate the controversy resulting from the sinking of the run runner, the Aloha, off the Louisiana coast in 1929 held that the United States should apologize for sinking the vessel and should pay Canada \$25,000 as compensation.

The decision was given by Justice Van Devanter, of the United States supreme court and Chief Justice Duff, of Canada.

In the long drawn out case Canada had claimed damages of \$386,000.

The commission reported that no compensation should be allowed to the owner for the ship or its cargo.

As for the master and crew it was found they were not parties to any conspiracy to smuggle liquor into the United States, but were mere employees to navigate the ship from place to place as owners directed.

By reason of their non-participation in the alleged conspiracy, the commission found they should be compensated for their clothing and effects which were sunk with the ship and for the wrong that was done them by casting them into the sea and then putting them in irons. This was done by the coast guard.

The commission recommended the United States pay John T. Randall, captain of the ship, \$7,906; representatives of John Williams, crew member, who has since died, \$1,250; Jens Jansen, \$1,098; James Barrett, \$1,092; representatives of William Wordsworth, now dead, \$57; Eddie Young, \$999; Chasley Hobbs, \$1,323; and Edward Fouchard, \$965. All the latter were members of the crew.

Amanda Mainguy, widow of Leon Mainguy, sailor who lost his life when the Aloha was sunk, was awarded \$10,185 for herself and children.

### New Bluebird Car

Sir Malcolm Campbell Has Re-designed Monster Races

Bromley, Kent.—A great aquat new Bluebird which Sir Malcolm Campbell hopes to send singing down the sand at Daytona Beach, Fla., at more than 300 miles per hour a little over a month hence, emerged from its cradle here.

Product of 18 months of unceasing research and labor, the famous racing monster presented a vastly altered appearance and surprised even those closest to her equally famous pilot.

Completely redesigned, from her broad snout to the tip of her tail fin over 28 feet away, the glistening new juggernaut is now so flattened out it looks almost like a bobbed on wheels.

Viewed from the front, there is a direct resemblance to a flat-head shark, with an intake shutter across the front making a realistic mouth. Sir Malcolm seemed prouder of this shutter than anything else. "When I close it at top speed I should get 15 more miles per hour," he said.

London.—All European capitals are again talking disarmament—surest sign of lessened tension.

An active Soviet participation in the League of Nations, the Franco-Russian and Franco-Italian pacts, with the Balkans calmed down and the Saar question seemingly well on the way to orderly settlement, all have contributed to a new atmosphere and an increased sense of security.

Britain now is anxious to press forward to real accomplishment. France, which last spring abruptly declined to recognize German rearmament in violation of treaty obligations, gives indications under the new regime of a modified attitude. The present tendency in France seems to favor acceptance of German rearmament as an accomplished fact, which cannot now be prevented and therefore should be brought under general control as quickly as possible. This has long been the British attitude.

Her Von Berger-Waldenegg, Austrian foreign minister, declares the Rome agreements brought about a substantial relaxation in the tension between Rome and Belgrade and Budapest and Belgrade. In the Rome agreements an attempt was made to bring about a general rapprochement of European states. Their greatest value was that they created no new bloc of powers which must have given rise to a counter bloc.

Budapest and Vienna alike press the importance of Germany returning to the scene. And it is on the return of Germany to Geneva that efforts are concentrating.

### Armament Race

Says United States And Japan Building On Pre-War Basis

London.—The United States and Japan are clearing their decks for a naval armament race, the Financial News has warned.

"There is only one fundamental danger-point in the Pacific demonstration of the Washington naval treaty by Japan, coupled with a \$180,000,000 increase in defence estimates," said the paper. "This means that the way is practically clear for a naval race of the pre-war variety."

The editorial added there was an urgent need for adoption of a decisive British policy in the Pacific, with a view to keeping the peace. After pointing out that Britain would be "badly put for replacements" in naval ships, the Financial News said that in order to improve Anglo-Japanese political relations "perhaps the first essential" is an improvement of trade relations.

### Dr. Dafeo Honored

Toronto.—Dr. Allan Roy Dafeo, the quiet little man of Callander who is physician to the Dionne quintuplets, has been made an honorary member of the Toronto Academy of Medicine, it was revealed here. The academy voted its highest honor to the north country doctor. There can be only 25 honorary members, at present there are only 15 living, among them Sir Frederick Banting, discoverer of insulin.

## To Co-Ordinate Efforts Of Prairie Provinces To Deal With Drouth Problem

Saskatoon.—Establishment of a joint committee representative of the Manitoba, Saskatchewan and Alberta governments to receive and discuss information on the drouth problem on the Canadian prairies with the ultimate objective of a uniform policy for the benefit of western agriculture, was the main result of a round table conference of the premiers of the three prairie provinces held in Saskatoon.

The new board, to be named the joint committee on land utilization and management, was announced by the premiers at the close of their all-day session here. It also was announced that the federal government would be asked to appoint representation to the body for a meeting to be held at a date yet to be arranged. This meeting, it was decided, should take place before February 7.

Present at the conference were Hon. John Bracken, premier of Manitoba; Hon. J. G. Gardiner, premier of

Saskatchewan; Hon. R. G. Reid, premier of Alberta; and Hon. J. G. Taggart, Saskatchewan minister of agriculture.

The government leaders' expressed purpose was to discuss ways and means of co-ordinating efforts in the three prairie provinces to deal with difficulties arising out of drouth.

They disclosed they had come to the conference with open minds on the subject of western agriculture's primary menace and hoped at this initial gathering to evolve some basis for uniform future action. The joint committee, they announced at the close of their deliberations, would receive and compile all information available on which policies for the future might be based.

The exact nature of the discussions, other than the need for a central organ for the gathering of information and formation of policy, could not be learned.

## NOTES AND COMMENTS

THE GLORY OF past achieve-  
ment, though adding lustre to your  
name, will not carry you through to  
success. We were reminded of this  
on reading in the Lethbridge Her-  
ald an article on "Advent of Crow  
Leap," which tells of the "Vets"  
team of 1919-20, and its achieve-  
ments, but it does not mention the  
later victory of Coleman team which  
entitled it to play in the Allan Cup  
finals at Vancouver and Port Ar-  
thur.

THE POINT is, that it is the  
calibre of present day teams alone  
which will count. Past glories will  
not help, and if Coleman is to re-  
tain the intermediate championship  
won in such brilliant fashion last  
season, it must put forth every effort  
it knows how and the players must  
keep themselves in the pink of con-  
dition.

RADIO LISTENERS have heard  
Premier Bennett declare the Con-  
servative party has usurped the  
place of the Liberals as the apostles  
of progress, and that Hon. Macken-  
zie King has nothing to offer the  
electors. William Aberhart con-  
tinues to pound out his exhortations  
on Social Credit mixed with scrip-  
tural teaching, and everyone has  
been highly entertained. Gerry  
McGee, mayor of Vancouver, made  
people sit up and take notice; he  
also persuaded them to go to church  
at least once a year, himself going  
twice on one day, escorted by a few  
aldermen and an odd policeman or  
two. Liberal Leader Howson of  
Alberta is putting forth an en-  
ergetic campaign, while the U. F. A.  
party is puzzling its brains how it  
can offset the loss of support which  
it believes it faces through Social  
Credit teachings.

VERY LITTLE has been heard  
of the Conservative party or the In-  
dependents. With all these preach-  
ments on how present problems are  
to be solved, a wise old sage listen-  
ing in expresses the humble opinion  
that no matter what remedies are  
propounded every tub will have to  
rest on its own bottom, evidently  
meaning that it is up to every man  
to at least try and help himself re-  
gardless of bright-hued promises of  
old-age pensions, relief doles and  
monthly dividends.

A LITTLE woman who has a  
paper round in Coleman remarked  
it was the most pleasant Christmas  
she had spent in quite a long time.  
"People were very kind," she stat-  
ed as she left her weekly paper at  
the office. Her appreciation was a  
shining example of gratitude. We  
have seen and heard plenty of "de-  
munds" out of all reason, but here  
was a pleasant contrast of one who  
never asking for anything, and  
accepting nothing except what she  
honestly worked for even at great  
personal discomfort. It is a true  
saying in most cases that "The Lord  
helps those who help themselves,"  
even though at times it may not  
appear so.

MAYOR PATTINSON decides  
to take a holiday. He deserves it,  
for during his term of office he has  
given much of his time attending  
to details of the town's administra-  
tion. It is doubtful if any other  
holder of the office has given as  
much time or gained such results as  
he has. Fortunately he was in a  
position to give time from his busi-  
ness affairs, but the point is that  
though he might have sat back and  
let things take their course, he saw  
opportunities whereby ratepayers'  
money might be saved and took ad-  
vantage of them. People who ap-  
preciate good service will commend  
him for his efforts and hope he and  
his wife will spend a pleasant hol-  
iday in the balmy climate of Van-  
couver Island.

## CONSTIPATION ENDED FOREVER

### Woman Finds a Permanent Remedy

With perfect frankness a woman correspondent writes:—  
"I have suffered from constipation as long as I can remember, and taken all sorts of things which in some cases seemed to do good at first, but afterwards to have no effect. Then I thought I would try Kruschen in my tea every morning, and I have done so for over a year. I am pleased to say after the first month I had no more trouble with constipation, and I have felt very fit."—(Mrs. G. M. S. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate the organs of elimination to smooth, regular action. Your system is thus kept clear of those impurities which, if allowed to accumulate, lower the whole tone of the system.)

## WORLD HAPPENINGS BRIEFLY TOLD

A fortune in gold greater than any mined since prehistoric times was taken from the rich hills and streams of Western Australia in 1934. It was announced the value of the total production was valued at £272,728.

It was announced the government of the Irish Free State has implemented the recent understanding with the British government for greater exchange of Irish cattle and British coal.

Commissioner John McMillan, Canada's new Salvation Army chief, and Mrs. McMillan arrived in Toronto to take over command of their new territory. It is the commissioner's third post in Canada.

With public meetings throughout the Dominion, a Canadian Education Week will be held under the auspices of the Canadian Teacher's Federation from Feb. 3rd to the 8th, it was announced in Montreal.

More than 500 lives were lost due to motor vehicle accidents in Ontario during 1934, a bulletin issued by the provincial department of highways states. Approximately 10,000 were injured, some permanently crippled or disfigured. Fatalities and accidents increased over last year.

The city of Vancouver has no intention of repudiating its debt charges, Mayor G. G. McGeer declared, but he intends to "lead a movement for reduction of high interest rates municipally, in all Canada, as well as provincially and federally."

Saskatchewan motorists who operated on the deferred payment plan in 1934 will be debarrated from obtaining 1935 licenses until their past dues are paid. In order to effectively cope with the problem, motor license officials have been instructed at the branch offices to issue no license plates. All plates are to be issued from the Regina office.

### Monster Timber Wolf

#### Trapper Near Sudbury Shoots Huge Beast Over Seven Feet Long

In front of a Sudbury fur store hangs the pelt of a monster which has been one of the largest of Canadian timber wolves. The fur is 7½ feet long from nose to tail. The beast, brought down in the heavy timber of Gogama district, stood 2½ feet high when alive.

Two weeks ago C. Potvin, Gogama trapper, rounded a bend of a creek while covering his trap lines and suddenly found himself 12 feet in front of the largest wolf he had ever seen. With the wind at its back, the animal had not scented the man approaching.

With blood and fur on its jaw from a rabbit it had just killed, the wolf bristled and snarled a challenge at the stunned trapper. As the beast tensed for its leap, the trapper shot and the wolf dropped in its tracks, shot through the head.

### Aerial Device Success

Scientists at the University of Chicago have perfected a baby stratosphere balloon. It is an automatic fact-recorder aerial device. During recent tests, the balloon soared more than 14 miles and before its contents were dashed to bits, the automatic radio broadcasting device had sent its precious records back to the receiving set.

"I expect my wife to be just what she is now twenty years to today."

"Why, that's unreasonable."

"Yes, that's exactly what she is now!"

W. N. U. 2081

### Suffering Of Jap Peasants

#### Being Undernourished Most Of Them Die In Their Forties

The following article by K. Yoshino, appeared in the Nippon Yohbun, Prague, Czechoslovakia.

If Japan mobilizes against the Soviet Union, it needs more than the few divisions that are sufficient to deal with the Chinese generals, will the Japanese peasants obey orders cheerfully?

In our village peasants work in the fields and cannot even afford to return until the evening stars appear in the sky. They spend the whole day bent over their labor. Being undernourished even the strongest of them soon weaken, and most of them die in their forties. They have a run-scorched, dry, dirt-colored skin, deep lines in their faces, thin stomachs with sharply protruding ribs, and blue spots under their eyes.

Their clothes look like sacks. They walk barefoot, as do their wives and children. They are chary of words and misanthropic. Every poor peasant would get drunk if he had the money, but our peasants never have any extra. They earn so little that they can hardly pay the interest on their debts and prepare for the next harvest.

They have stopped eating meat and fish and cannot even afford to return to the roots of plants, a little cooked wheat mash, and turnips boiled in salt water.

More than three-fifths of the agrarian population ekes out a hungry existence in this way. Even the middle peasants are content if they can eat rice and some fish. The agricultural-police officials report that the peasants steal the pet animals of well-to-do people in the towns, running the risk of the severe punishments that are meted out for such a crime. The same police reports also state that the number of robberies is increasing day by day and that in many parts of the country peasants are uprooting the trees in the holy royal forests.

The children of the poor peasants are undernourished. The prefect of the northern province states that the school children in his districts look as if they were all suffering from jaundice. They go to school with empty stomachs and collapse unconscious during the recess periods, with the result that numerous schoolmasters have asked permission to give up their posts.

### Compliment To Dr. Dafoe

Ontario Minister Of Health Pays Tribute To The Country Physician  
Hon. Dr. J. A. Faulkner, Ontario minister of health, Dr. Edmund Kelly, noted specialist of Johns Hopkins University, and Dr. W. A. Dafoe were recent weekend guests of Dr. A. R. Dafoe, the Dionne physician.

Dr. Kelly, who is personally interested in the quintuplets, and makes the trips to Galtider at his own expense, administered radium treatment to the tumor on Baby Marie's thigh. He later expressed the belief the tumor would soon vanish.

It was the first visit of the Hon. Dr. Faulkner, and he was impressed by the care the five little sisters were receiving.

"I cannot pay too high a compliment to Dr. Dafoe," the cabinet minister remarked. "He has set an example for the medical fraternity and has drawn deserved attention to the country doctor, a class whose service has been little understood, and certainly not fully appreciated."

### Great Lakes Water Level

Expect Levels Will Never Be So Low Again As Has Been This Winter  
There's a good possibility, U.S. army engineers believe, that never again will man see the Great Lakes water levels so low as they have been this winter.

Mother Nature is taking a hand, they say, to restore the lakes to a normal level and once that point is reached an ambitious engineering scheme is already designed to keep it that way.

The engineers propose to do it by constructing a series of compensating weirs—large obstructions—at the bottom of the St. Clair and Niagara rivers at a cost of approximately \$120,000.

The immediate goal for increasing the lake levels is in the opinion of Major W. F. Hickey, of the army engineers' staff in Cleveland, lies in the fact that this winter the Lake Superior region has experienced the heaviest rain and snowfall in a score of years.

"But, madam, I'm afraid you are making a mistake. I'm a doctor, but a doctor of music."

"I know," said the old lady. "Two a terrible singing in my ears."

During the season of the year when friends delight to drop in unexpectedly is a time you'll appreciate the great all-purpose value of PURITY FLOUR. Not only does it make delicious shortbread—always a favorite with the unexpected guest—but it is truly the flour which is best for all your baking. Whether you are making light, tasty cakes, delicious flaky pastries, or more staple baking, such as bread or rolls, you'll find the uniformly high quality of PURITY as an asset in your kitchen. Each bag maintained at the same high level, through careful selection of hard spring wheat in Western Canada by our representatives. Buy a bag of PURITY FLOUR at your grocer's. You'll find one brand—and that PURITY—all you need to keep in your kitchen for all kinds of baking.

## PURITY FLOUR BEST FOR ALL YOUR BAKING

### Brazilian Nickel

#### Fabulous Finds Are Reported From Goyaz

Layers of nickel so rich as to appear "fabulous" to Brazilian officials who have reported on them are being exploited in the wild state of Goyaz, and their yield is being shipped to Germany in large amounts, it was disclosed at Rio de Janeiro.

Jacques de Moraes, government technician, recently concluded a study in the Mantiqueira Sierra of the state and laid his report before the ministry of agriculture, recommending strict government supervision of a natural resource of wealth "that has the aspect of fable, so marvellous it is."

The particularly rich territory is said to be a tract of some 12½ miles in length, running up to a little over a mile in width.

### FASHION FANCIES

### TAILORED PEPLUM DRESS FOR BUSINESS AND "DRESS-UP" TYPE FOR PARTIES IN ONE PATTERN!

By Ellen Worth

Don't you think this little peplum dress smart? It wraps the figure in such a youthful way. And isn't the scarf tricky slipped through a slashed bound opening?

This little rig is stunning in a woven material, say rich tulle, Kelly or bottle green, monk brown, etc. For the scarf collar velvet or self material is smart. Of course this model is lovely, too, carried out in pebbly crepe silk.

The model in the miniature sketch is bright red pebbly crepe silk. Again this model is adorable in transparent velvet or metallic crepe silk.

Style No. 922 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 6½ yards of 39-inch material with 1½ yards of 39-inch contrasting for dress and jacket.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine. Pattern and magazines are mailed post paid.

"How To Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or expert adept with the needle, we think it would pay you to obtain it.

A man's knowledge cannot be compared with a woman's intuition.

### YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst)  
(All Rights Reserved)

(Editor's Note: Handwriting will often reveal talents as well as your weak and strong characteristics. A Character Analysis might mean the beginning of a new life for you. Read the author's invitation following this week's article.)

Mr. J. J. Winnipeg, writes: "I am sending you a sample of my girl friend's writing with my own and would like to ask you what I can do about improving the quality of her writing. It seems to be having so often. She is a very likeable girl in many ways and I am extremely fond of her, but we have these quarrels—albeit they often seem to me—and unless something is done about it, it looks as if I myself am really responsible for these interminable quarrels. I do all that I can to have things go smoothly along. Can you give me any advice?"

My dear Mr. J. J., the writing of your girl friend shows that she easily gives offence. She is inclined to "carry a chip" on her shoulders, and often imagines alights where none is intended. The trouble with her writing is that it is almost invariably the person most concerned does not realize it.

And this characteristic can cause a great deal of harm. It has led to perpetual bickering between the two of you, and may easily put an end to your romance, unless steps are taken to eradicate it.

I am writing to you direct, and will enclose a separate letter covering your girl friend's writing, and it may be that, by showing it to her, she will be able to bring home to her what a serious characteristic it is. I sincerely hope that it may be the means of stopping your trouble.

Miss W. writes: "How can I keep my boy friend. I am very much in love with him and really believe that he loves me in return. Not only because he tells me so, but because of those little things that tell a girl when a boy really thinks a lot about her. But, lately, he seems to have been going out with other girls. I am not sure if he is going out with other girls? Does that show that he does not really love me, after all? I am so worried, and would appreciate so much your advice."

In the first place, Miss W., I would tell you that your boy friend is reliable enough. He is a normal type of young fellow; not very intellectual, perhaps, but straightforward. The trouble in his case is that he is somewhat vain. He thinks a good deal of himself.

He is quite good-looking. The other girls have appealed to his egotism, and, feeling quite pleased, he has been going out with one or two of them.

It is significant, however, that he comes back to you, Miss W. My opinion is that he will grow out of this sense of ostentation. Something may turn up that will give him a shock—something that will change his self-complacency. There is a deep-rooted balance in his nature, and he will come to the surface before very long. After all, he is still young. Do not make the mistake of pandering to his egotism. Do not get the habit of catering to his vanity. Be natural with him, as you have always been. That is really what has appealed to him about you, although he probably does not realize it.

Can this well-known writer and graphologist help you, as he has helped so many others? Your handwriting tells the story and will tell the truth about your friends. Send specimens of the writing you wish to be analysed, stating birth date in each case, and enclose 10c coin for each specimen. Send with your analysis to: Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters are all confidential, of course. Replies will be sent as quickly as possible, but please allow at least two weeks for your reply.

Dried fruit in powdered form is a new confection in London

## From the New PURITY COOK BOOK

Illustrated in shortbread recipe number 424 in the new PURITY COOK BOOK. Contains 745 tested recipes, with numerous household hints and menus, this new PURITY COOK BOOK, costing \$10.00 and two years of research to prepare, is invaluable.

Easy to keep clean and lies flat at the opened page. Sent postpaid for 50 cents. Write for your copy today to: Dean 457, Western Canada Flour Mills Co., Limited, Toronto, Winnipeg or Calgary.

## SUNDAY SCHOOL LESSON JANUARY 20

### PETER'S LESSON IN HUMBLE SERVICE

Golden text: All of you give yourselves with humility, to serve one another. I Peter 5:5.  
Lesson: John 13:1-17; I Peter 5:5.  
Devotional Reading: Luke 14:7-11.

### Explanations And Comments

Peter's Lesson in Humble Service, John 13:1-11. When Jesus came to Peter, Peter said to him, "Lord, dost thou wash my feet?" In the Greek the pronouns thou and my are in emphatic contrast at the beginning of the sentence.

Jesus answered, "What I do thou knowest now; but thou shalt understand hereafter." Obviously these words had a deeper meaning than the immediate situation; they referred to the time the disciples would meet in the coming hours when they would not understand the terrible events and would have to walk by faith. Only as the incidents in the Upper Room were surveyed in the light of Gethsemane, Calvary and the Resurrection, could they be understood.

Impulsively Peter then exclaimed, "Thou shalt never wash my feet." "It was the old, strange mixture of self-conceit and self-disgust—the self-conceit which under the shadow of Hermon had called upon him so stern a rebuke when he had said, 'That be far from thee, Lord; this shall not be done unto thee.' The self-disgust which, on the Sea of Galilee, had flung him to his knees with that great cry wrung from his yearning heart, 'Depart from me, for I am a sinful man, O Lord' (Lk. 9:34, 35)."

That the customary foot-washing had not been performed before the meal began was due, we gather from Luke's parallel account, to the fact that the disciples had been disputing as to which of them was the greatest, and there was no one among them free enough from self-assertion and jealousy to perform this menial task for the others. Jesus showed them that the patent of nobility within the Kingdom of Christ is the towel with which man girds himself for service.

### Famous Quintuplets

Ontario Government Keeping Watchful Eye On Contracts For

The Mail and Empire in a news story says the Ontario attorney-general's department "is reported to be keeping a watchful eye on contracts which may be entered into shortly on behalf of the Dionne quintuplets."

The Mail story says: "Noting the department now the official guardians, which Hon. Arthur W. Rookbach appointed to the babes last fall, will, it is understood, tolerate any agreements of a 'side-show' character, but on the other hand are not adverse, it is said, to contracts that would raise such a moral issue as to whether the future upbringing without prejudicing their health."

### Dew Supplies Moisture

Corn is growing without the aid of rain on the Canadian prairies. Dew supplies the moisture and the stalks are so short that the ears touch the ground. The crop is planted in a mass of cinders, preventing evaporation.

One feature in favor of the old style phonograph over the radio is that it doesn't take time out to tell us about, tooth paste, auto tires and stomach medicine.

## Little Journeys In Science

### ELECTRICITY (By Gordon H. Guest, M.A.)

The first observed electrical effects were produced by rubbing amber, and the word electricity is derived from the Greek word for amber, namely elektron. Amber was used in spinning, the oldest handwork known to the human race. Spinning was performed by means of the distaff, and sometimes the spindles were made of amber. The spinner called her spindle the "clutcher" because as the spindle descended and whirled around, it rubbed against the loose feminine garments, thus becoming electrified, and on nearing the ground, it attracted bits of chaff or leaves.

It was not, however, until 1600 A.D. that Dr. William Gilbert, surgeon to Queen Elizabeth, and son-in-law of the famous astronomer, Benjamin Franklin introduced the terms positive and negative to distinguish the two kinds of electricity. It was Franklin who showed by flying a kite in a thunder storm and drawing sparks from the insulated lower end of the kite string that lightning and electricity were the same. He was the inventor of the lightning rod. According to Franklin, any body is positively charged with electricity if it is repelled by a glass rod which has been electrified by silk, and negatively charged if repelled by sealing-wax which has been rubbed by cat's fur. These definitions, given us by the famous Franklin, are still in use.

It was shown many years ago that when a glass rod is rubbed with silk, the latter takes up a negative charge exactly equal to the positive charge of the glass. Thus, in general, it may be stated that positive and negative charges of electricity always appear at the same time and in exactly equal quantities.

### Saw Much Active Service

#### Varied Career Of British General Who Retired In 1929

General Sir Archibald Hunter, who has been in hospital in Jamaica, had seen an unusual amount of active service when he retired in 1929, says the News of the World. Fifty years ago he served under Grenfell in Egypt, and was dangerously wounded. Later he commanded the Gona frontier Force and was Governor of Omdurman. He was called from India to lead a division in South Africa, and was one of the most successful British generals in that campaign. For three years he was Governor of Gibraltar, and at the outbreak of the Great War he was in command of the Third Army. For four years he represented Lancaster in Parliament.

### Must Know His Job

#### Dictator Of Turkey Pays Man To Taste His Food

Mustapha Kemal Pasha, dictator of Turkey, assigns one of his secret service men to taste all his food for one hour before he dines. Evidently the ruler has not just created a job for a nice fellow. He must know what he is about. The man who gets \$15,000 a year for this work does not seem to mind it. He says he saves food and tastes the best of everything although there may not be much future in the job.

The first organized attack on cancer by educating the public was made in 1902, when a German physician issued a pamphlet and newspaper publicity.

Twenty-five per cent. of the apricot crop in Shepparton, Australia, district, was destroyed in recent hailstorms.

## THE TENDERFOOT

By  
GEORGE B. RODNEY  
Author of "The Coronado Trail",  
"The Canyon Trail", Etc.

## SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur ranch has been systematically looted the ranch, and old Jos Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now in returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling flour-class cattle and protests against it.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding close a long way from the Hour-glass ranch house.

Dustin unexpectedly comes along and seeing them, Stone and Edith, dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious.

He insults Stone, who promptly throws him into a pool of water. Stone tells Crews, his foreman, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Crews go to Seco to send a telegram to Gerald Keene. When the Seco attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has been the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery and appraise its value. Dad Kane shows Dustin the mine and samples of the rich ore he has discovered.

(Now Go On With The Story)

## CHAPTER IX.—Continued

Kane struggled in his blankets and came back to consciousness in an untidy figure in the half-light. His gray old face was covered with a two-weeks-old stubble, his mouth dribbled tobacco-juice and his eyes were rheumy with sleep. Such a man had no right to live.

"Come on over here. I have something to say to you..." Kane got up and moved over, squatting by the side of the fire. He pulled the coffee-pot to him and filled

## Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their Grip on Things

Many people "round 40" think they're "getting old." They feel tired, nervous, "weak." Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this is in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person. Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale in all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genoa's "PHILLIPS" Milk of Magnesia.

**PHILLIPS' Milk of Magnesia**

W. N. U. 2081

his cup, for, like all prospectors, he could drink coffee at any hour.

"Well," he said ambivalently, "shoot your wad."

"That vein you showed me looks mighty good at first sight," said Dustin.

There was no room for argument there. It was a statement that met Kane's whole-hearted approval.

"'Tve been huntin' for somethin' like it for more'n thirty years," he said. "Go on..."

"After we've staked out our claim..." What then?

Kane temporized. He knew well enough what the usual steps were. As a rule the man who had grubstaked the prospector got half the claim, sold out and the man to whom he sold it would be reluctant to invest more money. It was always a question of more money. The whole history of mining in the West is replete with that. Thirteen dollars are put in every mine for each dollar that is taken out... Till the property passes into the hands of a corporation that has money to throw away.

Kane sucked his pipe reflectively.

"Well," he said finally, "I reckon we'll have to hire a lawyer an' fight our claim through the courts. After that we kin build a dam over in Coyote Canon... That's just over the next ridge... an' the pipe the water over here; put our crusher an' tables in here... An'..." He droned on in the unending plans of ignorant prospectors the world over. "Anyhow," he said, "there's a million in it..."

"There might have been," said Dustin sharply. "If you hadn't been a damned fool." He chose this way to lash himself into a fury—that would justify to himself what he meant to do. Kane was quite right. There were millions in it... but not for Kane.

"Where's the ore you took out?" he asked abruptly.

"I stacked two sacks of it over there..." Kane waved his hand at a shadowy mesquite clump. "Did you think I'd sold it on you?"

Dustin said nothing. He followed the faint figure through the scrub to the square figure through the scrub to a formless pile of ore-sacks, selected a couple of pieces of ore-laden rock from one of them and dropped them into his coat pocket. Then he turned to Kane who was watching him shrewdly.

"You damned old fool," he snarled. "You've got us into a nice mess." He stamped back to the fire with Kane behind him and his hand deep into his middle-bags that lay by his blankets.

His quick eyes took in the mine and samples of the rich ore he had discovered.

He pulled the coffee-pot to him and filled it with water. Kane watched him do it with a look of intense interest.

"You and your salted stuff," said Dustin angrily.

"Salted..." Kane emitted an angry roar and snatched at the rock. Even a desert rat has his points of honor, and this quick old Kane's, but he never failed to make his point.

A short, stabbing jet of flame leaped from the loose blanket over Dustin's arm. A flat, smacking report like the noise a plank makes in falling on quiet water jarred the desert air. A little cloud of white smoke eddied from the end of the blanket.

Old Kane, Dad Kane, Shammy-skin Kane, and very wise Ulysses of the foot-hills, sank to his knees and slowly rolled over on his face while his claw-like hands worked convulsively. Then he lay still.

Dustin cast a hurried, frightened glance over his shoulder at the still-sleeping Peyotli. His quick eyes, with a hunted glare in them took in the purities of the camp, glancing at hill and leath and stunted bush that surrounded them. The world-old gri of the killer was taking form: "Did any one see me?"

Even Dustin could not stand the strain.

"Oh, my God!"... He choked a little... "He dropped like a shot right..." Then he rocked on his heels and was violently sick.

For a moment he squatted there in the brush overcome by the violence of his emotions. Even in his life, bad as it had been, this had never happened before. The need had arisen. Old Kane had only struggled to force it out it would have been different. He felt that even some show of violence would have given him a reasonable excuse. Suppose some one had seen him!

Then common sense came to his relief. He knew there could be no man in this wild herd. There could be no danger of course but first he must complete his plan. He must eliminate all chance of suspicion. From the very first plan had been to make Peyotli the scapegoat for his act.

## To SLEEP more SOUNDLY and WAKE REFRESHED Take

**Wincarnis**

THE GREAT TONIC

He snatched that lump of ore from the ashes. Then, though his shrinking muscles nearly refused to function, he grabbed the rock and held it at the back of Kane's head and laid the rock aside. Again he scrutinized the hills, now blue-black with the falling night. No danger from any observer here. The hobbled horses seeing him move, dashed off into the brush anticipating capture. What a fool he was to think that muffled report would arouse Peyotli!

Under ordinary conditions a Derringer pistol makes little noise and he had silenced his with a blanket. The vast silence of the desert enveloped him as in a blanket and the cold wind from the north chilled him to the bone but he walked over to the fire, rummaged among the bedding where Kane had slept and then came back to where Kane lay. In a daze he picked up the still limp body and carried it to the fire and laid it head to foot by the north-like shape of the sleeping Peyotli. With the care of a workman who looks only to a completed task, he laid the blood-stained rock in the great palm of the sleeping man. Then he half-emptied Peyotli's canteen and laid it between the two bodies. The next moment he was shaking Peyotli by the shoulder and shouting in his ears.

It was no light job to awaken Peyotli. He fought with hands and feet against awaking. He rolled and struggled and pitched and with every effort he made he seemed to sink deeper into a last convulsive struggle.

Peyotli grunted and sat up. He stared for one long heart-breaking moment at the blood-stained rock clenched in his hand! Then his wondering eyes took in the limp body at his feet! The half-emptied canteen! His uncomprehending eyes swept Dustin staring at him and finally his gaze came back to Kane.

"What the hell..." he demanded. "What the hell..."

"? His wandering finger traced a line in the air and his jaw dropped. His breath drew hard in great gasps and a look of insensate terror dawned in his eyes.

"What in hell have you done, Peyotli?" demanded Dustin curiously. "I was out lookin' at the horse when I heard you two fightin'..."

You woke up and yelled for water... You said Kane had stolen your water and you'd kill him, for it..."

What've you done?" Still Peyotli stared at him, then he gazed at the rock still in his great hand and he rose slowly to his feet.

"... I was..." "I was dreamin'..." he began. "I was dreamin'..."

"I was on the edge of a pond and old man Kane..."

Suddenly he began to sob, great tearless sobs that came from his diaphragm and that racked him in spasms.

"Oh, my God!" he wailed. "I never meant to do it! I never even thought of it..."

That cursed stuff you gave me... That cursed stuff... I'd never have done it but for that stuff..."

"That you stole while my back was turned," said Dustin accusingly. "I brought along a little bit of it to sort of taper you off your damned spells and you stole the whole supply. No wonder you committed murder..."

It was much easier than Dustin had believed possible.

"You see what you've done," he said accusingly.

## Are You Rundown, Tired?

Mrs. Mary Murphy of 11 Westinghouse Ave., Hamilton, Ont., writes: "About five years ago I was terribly rundown, had indigestion, couldn't sleep or eat, lost strength, and my weight fell off 20 pounds. I had finished the first bottle of Dr. Pierce's Favorite Fractionation and felt much better. Had more strength and better digestion. Now I take 30 cents bottles of Dr. Pierce's Large size, tablets or liquid, \$1.35.

The soul-racking sob continued. It is not in man to destroy his kind, or being innocent, to believe that he has killed, which is worse, without giving some sign.

"You just got mad and mashed his head in with that rock," said Dustin. "You had some fool doped dream about water..."

There's the canteen... And when he tried to keep you from takin' his canteen, you bashed his head in. Look at that rock!"

Peyotli dropped that rock as though it was red-hot and Dustin picked it up.

"Before God, Mist' Dustin, I never meant to do it... I never had a word with him... I liked the old man... Why would I kill him...?"

"Oh, shut up, you fool! I understand how it was. He was kind of provokin' at times but that will not help you with a jury... I'm just tryin' to figure it out... Of course I ought to take you back and turn you in for murder..."

Peyotli shivered.

"... I don't see any good in killin' another man. It's too darned bad though about old Kane..."

If any jury ever gets the evidence... Kane dead, empty canteen between you; you all hopped up with Peyotli; a fight between you over water... you with a bloody rock in your hand...

What did Dad with the back of his head bashed in...? Huh! I reckon you'll hang, Peyotli..."

"What're you goin' to do?" "Do? What do you reckon I'm goin' to do? You poor fool! You've been workin' for the Broken Spur for years. The Broken Spur don't throw off on its friends. Poor old Kane was only a desert-rat. In a year or two he'd have let you go. I ought not to let it but I'm goin' to anyway. Get a pick out of the pack and carve some under that mesquite bush where we can bury him."

In twenty minutes the panting Peyotli had dug a great pit in the rocky soil. While he was digging Dustin went very carefully through the pockets of the dead man. A muttered curse told that he had not found what he sought.

(To Be Continued)

## Alaska As Military Base

Logical One If Trouble Occurs Between U.S. and Asia

Vilhjalmur Stefansson, the distinguished Arctic explorer, holds that Alaska is the true military base for the United States in conflict with an Asiatic power. He points out that Tokyo is twice the distance from Hawaii that it is from Alaska. This will be obvious if one studies a map of the North Pacific showing diminishing lines of longitude as one approaches the North pole, and is not drawn on Mercator's projection.

This American base would be about the centre of the Aleutian chain of islands. Stefansson has great knowledge of Arctic. He loves it. He spent several years among the Eskimos, living off the country. He came out hale and hearty. He is one of those who knows that the Arctic is not a frigid and desolate waste. Food is plenty and not hard to get by those who know the region. No one will deny that the cold is severe in season, but people who know the North prepare to meet it. The sea up there is full of fish. Seal may be taken often and in the short summer the air is full of ducks and geese for other aquatic fowl. These birds breed in that Far North and bring their young birds to maturity for the long flight to the South.

As the years pass it is becoming manifest that the waste lands are often good. Under their forbidding surface, treasures of iron and coal are found. Then the desert farther south may be irrigated and made to produce richly. Seeds become acclimated and so do the people. Any race that has become acclimated to the North loves it, and would not live permanently elsewhere.—Fort Arthur News-Chronicle.

## Brings In Large Amount

Royal Wedding Presents Were On Display For Charity

It is expected that the sum raised for charity by the display of the wedding gifts of the Duke and Duchess of Kent will exceed the amount received after the wedding of the Princess Royal and the Earl of Harewood, whose presents were likewise placed on view at St. James's Palace, says the News of the World.

The amount on that occasion was £8,274 18s 3d. Half the total was allotted by the King, the other half by the Duke of Kent.

"Is your husband a member of any secret society?" "He thinks so, but he talks in his sleep."

## QUICKEST METHOD TO RELIEVE A COLD

Follow Directions to Ease Pain and Discomfort Almost Instantly

When you have a cold, remember the simple treatment pictured here... prescribed by doctors everywhere today as the quick, safe way.

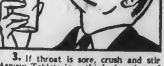

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water... every 2 to 4 hours the first day—less often afterward... If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM

THE HEART

## Little Helps For This Week

"The Lord gave and the Lord hath taken away, blessed be the name of the Lord." Job 1:21.

What Thou hast given Thou canst take And when Thou wilt new gifts can make, All flows from Thee alone; When Thou didst give it, it was Thine.

What Thou didst take, it was not Thine, Thy will in all be done.

We are ready to praise when all shines fair; but when life is overcast, when all seem to be against us, when we are in fear for some cherished happiness, in the depths of sorrow, in a season of sickness with death approaching, or in the solitude of a life which has no visible support—then to praise God, to feel the fear and pain are as sure tokens of His love as life, health, joy, and the gifts of home, this is the true sacrifice of praise.

What can come nearer to the soul which is in such true accord with God? What can make so much as one farthing tone in its harmony? In all the changes of this fift life, it ever dwells in praise.—H. M. Manning.

## Berlin Sacrificing Trees

Chopping Down Limes to Make Way For Subway

Some of the most famous trees in the world are being chopped down in Berlin in the process of building a new subway—the limes which give their name to Unter den Linden, the German capital's most beautiful street. The subway will connect several of the railway stations for north-south lines entering the city. It will run under Unter den Linden for a few blocks, beginning at the Brandenburg gate and along this route the trees are being sacrificed. New limes will be planted, however, when the work is completed. This is expected to be in time for the 1936 Olympic games.

Italy has no great mineral wealth. The most important mineral is sulphur.

## THE RHYMING OPTIMIST

By Aline Michaelis

### ANALYSIS

O, what is love? A dream complex To hide reality; I see you as my heart desires, And love the you I see!

If to my mood I fashion you, The fault is mine alone; You are a stranger to my view When once the truth is known.

It is not you, then, whom I love, But some fantastic shadow, bred of fate; Whose verity you cannot prove Nor from his claims escape.

The you I love is nobler far Than man could ever be, Endowed with splendor as a star, With flower at the sea!

Were I to thrust the dream aside From word and form and care, Some need in me would be denied And I must love you less!

One of life's perennial disappointments lies in the fact that an automobile you paint looks exactly like an automobile you have painted.

Italy has no great mineral wealth. The most important mineral is sulphur.

### LOCAL AND GENERAL

Mr. McColl of Parkbeg, Sask. is visiting at the home of his daughter, Mrs. Fred Cox, for the winter months.

The annual meeting of St. Alban's church is cancelled for this week. Meeting will be held Friday, Jan. 25, at 7.30 p. m.

Mrs. George Reid sailed from Glasgow on Saturday last for Coleman. Mrs. Chalmers, mother of Mrs. Reid, is seriously ill in the local hospital.

A local report states that more men are at present employed at Trail than for a considerable number of years, and it is difficult to secure houses.

Medicine Hat Monarchs report a rough trip from the Hat to Coleman. They had to get out several times to shovel their way through drifts. Starting out at 9 a. m. they finally reached Coleman at 7 p. m.

Robert Fenwick, 34 years, of Crossfield, brother of Mrs. W. J. Bartlett, Blairmore, passed away this week after an illness of some time. Mr. Bartlett returned on Wednesday from attending the funeral, and Mrs. Bartlett is remaining there for several days.

Harold Jones, of Jones' Garage, has built an exceptionally fine passenger bus for the convenience of the people of the Pass. The bus seats twenty-two passengers and is powered by a new Ford V-8 engine. Harold solicits the transportation business of all sports organizations and lodges.

A three cornered tie is still maintained in the Crow league by reason of Medicine Hat's win over Blairmore Tuesday night by a 10-7 score. Coleman through their goal average still stay in No. 1 position. Medicine Hat and Lethbridge are the other teams tied for the lead.

Mr. and Mrs. A. Beck, of Star Creek ranch, who have spent several months in Vancouver, intend leaving there for California for a visit, according to letters received by friends here. The Journal also acknowledges Christmas greetings received from Mr. and Mrs. Beck.

### UNITED CHURCH

Sunday morning, Jan. 20, the girl's choir will lead the singing and Mr. Taylor will have a story for the children. The sermon subject will be "Pray for Forgiveness."

Sunday school at 12:15. In the evening the choir will render a selection. The sermon subject will be the second in the series, on Pilgrim's Progress, and will deal with Christian's experience when he fell into the slough of despond.

Annual congregational meeting on Monday evening, Jan. 21 at 7.30 p.m. Members, adherents and friends cordially invited.

### ST. ALBAN'S CHURCH

Next Sunday the services will be: 12.30 p.m., Sunday school; 7.00 p.m., evening.

The annual parish meeting will be held in the hall on Friday at 7.30 p.m. for the purpose of transacting the annual business. It is hoped that every member will be present and take an interest in the proceedings.

FOR SALE: 3 Milk Goats and one Male Goat, at Star Creek Ranch, west of Coleman.

### NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF DANIEL MORRISON, late of Midlandvale, in the Province of Alberta, gentleman, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named Daniel Morrison, who died on the 15th day of October, 1934, are required to file with the undersigned solicitors for the Executor by the 1st day of March, 1935, a full statement duly verified of their claims and any securities held by them, and that after that date the Executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to his attention.

Solicitors for the Executor,  
Brodigan Bldg., Drumheller, Alberta

Announcing -- an important  
newcomer to the low-price field--

## PONTIAC SIX

Also an Improved Straight Eight

THERE'S a big new value in the low price field! It's a PONTIAC SIX... smooth-looking, smooth-performing... the kind of car that will make hundreds of new friends for Pontiac.

Few automobiles have consistently given greater measure per dollar than Pontiac, in style and long economical service. Consequently, few cars have won and maintained public goodwill as successfully as Pontiac.

That the 1935 model may be worthy to carry on so favorable a reputation, General Motors has built into this Six every basic Pontiac characteristic, plus an impressive list of improvements. Extra value features include scientific streamlining; solid-steel "Turret-Top" Bodies by Fisher; Triple-Sealed Hydraulic Brakes; Concealed Tire and Luggage Compartment; Fisher No-Draft Ventilation; and Double K-Y Frame.

As a competent judge of the points by which a fine automobile is recognized, we invite you to see the new Six, and its companion, the Straight Eight. Better still, we suggest that you drive them. Let actual experience be your guide to the happiest selection you could make for your next car.
